KYOTO

CONTENTS OF VOLUME XXVIII

PAGE

T. Seto, K. Asai and **A. Mito**—On the "Triple Melting" of Tripalmitin. 1

T. Ichinohe—Study on Change of Gravity with Time. Part III. On the Tidal Factor of Gravity. 11

S. Okabe—On Some Relations between the Hot Spring and Radioactivity. 39

T. Nishitake—Elastic Properties of Rocks with Relation to the Earth's Interior. 73

S. Okabe—Time Variation of the Atmospheric Radon Content near the Ground Surface with Relation to Some Geophysical Phenomena. 99

Y. Kishimoto—Seismometric Investigation of the Earth's Interior (III). 117

A. Kamitsuki—On the Seismic Waves reflected at the Mohorovičić Discontinuity (I). 143

T. Mikumo—Precise Seismometric Observations in the Epicentral Region of Local Shocks. 161

I. Takahashi, T. Watanabe and **K. Tanimoto**—Diffraction of Electromagnetic Waves by a Circular Cylinder of Infinite Length. 209

I. Takahashi and **T. Watanabe**—Transient Phenomena in the Wave Guide. 221

S. Okabe—On Some Relation between Atmospheric Ions and Natural Radioactivity. 231

K. Hosoyama—On the Observation of Secular Phenomena of the Tilting Motion of the Ground. 253

K. Harada and **T. Sakai**—The Effect of Electric Field upon the Structure of Thin Films of Some Dipolar Long-chain Molecules. 283

PAGE

T. Watanabe—Introduction of the Translational Operator in Frequency Domain and Treatment of Certain Linear Differential Equations, I. 293

T. Watanabe—Introduction of the Translational Operator in Frequency Domain and Treatment of Certain Linear Differential Equations, II. 311

S. Takemoto—The Complex Dielectric Constant and Permeability of Ni-Cd Ferrite System at Microwave Frequencies. . . 327

J. Muto and **K. Okano**—An Electromagnetic Isotope Separator 337

S. Kômura—A Consideration about the Mechanism of Occurrence of Large-scale Earthquakes, I. 363

S. Kômura—A Consideration about the Mechanism of Occurrence of Large-scale Earthquakes, II. 379

Y. Kishimoto—Seismometric Investigation of the Earth's Interior. Part IV. On the Structure of the Earth's Mantle (II). . . 391
